PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student experienced in building projects with React, Next.js, JavaScript, and Tailwind CSS. Creative problem-solver with strong adaptability and teamwork skills, passionate about solving real-world problems through technology. Aspiring software engineer and future entrepreneur.

EDUCATION

B.Tech in Computer Science | St Joseph's College of Engineering and Technology (SJCET), Palai 2024 – 2028
Pursuing core subjects in algorithms, data structures, software engineering, and computer networks. Actively engaged in technical clubs, hackathons, and innovation cells.

SKILLS

Frontend Frameworks & Libraries	React, Next.js
Styling Tools	Tailwind CSS, Bootstrap,
Programming Languages	JavaScript, TypeScript, Python, Java, C#, C, SQL
Backend Frameworks	Node.js, Express.js, Django, Spring Boot,
Databases	MySQL, SQLite, MongoDB, Firebase
Security & Auth	Password Hashing, Authentication & Authorisation, HTTPS, Secure APIs, Input Validation
Tools & Deployment	Git, GitHub, Vercel, Netlify, Render, Figma, Notion

EXPERIENCE

Frontend Intern	Mulearn	6 Months
- Developed and improved UI components using React.js; built responsive, accessible web applications with cross-functional teams. - Contributed to frontend architecture decisions, performance optimisation, code reviews, and agile sprint cycles.		
Technical Officer	Innovation and Entrepreneurship Development Cell (IEDC), SJCET Palai	2026 – Present
- Led technical initiatives and workshops; collaborated on tech-based prototypes and proof-of-concept solutions. - Mentored junior members on technology tools and guided them through project development phases.		
Design Lead	Computer Science and Engineering Association (CSEA), SJCET Palai	2025 – Present
Designed posters, banners, and digital content for events using Figma and Canva; maintained consistent visual branding across all platforms.		
Web Team Member	IEEE Student Branch, SJCET Palai	2025 – Present
Worked on website development, UI improvements, and published event updates and technical articles for the student branch portal.		

PROJECTS

Secure Print Sharing System	2026	Relationship Web Application	2026
Full-stack web app for secure document sharing with end-to-end encryption, real-time database updates, secure link sharing, and role-based access control.		Platform to visualise and manage user relationships using interactive graph-based UI, dynamic data rendering, and responsive layouts.	
AI Interview Preparation System	2026	Class Seat Reservation System	2025
AI-based interview practice system with real-time interaction, instant feedback, NLP-based response assessment, and personalised improvement suggestions.		Classroom seat booking system with real-time availability, user authentication, booking history tracking, and admin dashboard.	

ACHIEVEMENTS & RECOGNITION

- 1st Place** — **SheBuild Hackathon**, CSEA, SJCET Palai — recognised for innovative problem-solving and technical execution.
- 2nd Place** — **Smart India Hackathon (SIH) Preliminary Level** at SJCET Palai, competing against multiple college teams.
- Selected** for an exclusive 3-day technical workshop at IIT Madras, one of India's premier engineering institutions.
- Consistently recognised for creativity and technical leadership within college clubs and academic circles.
